ComAp control products are used in a number of major hospitals across the Kingdom of Saudi Arabia at sites in Riyadh and Jeddah cities, which include the National Guard hospitals, Shumaisi hospital and the King Faisal Hospital. These hospitals are the cornerstone of healthcare in the country and deliver high-quality medical services alongside research and education.

National Guard Hospitals – Riyadh and Jeddah Cities

Al Sawyeh Co was commissioned to renew a total of 220 MCC panels and 35 DPB's at the hospital.

Shumaisi Hospital – Riyadh

At this 1000-bed hospital, Saudi ATS specified IS-NT to control and manage four MTU diesel powered generators providing 2000MVA/400V/1400 kWA with synchronizing via iCB-MTU CAN and encompassing IL-AMF 25 3200A 4P draw out with by-pass.

King Faisal Hospital – Riyadh

KFSH is a specialist 894-bed hospital that now uses two IS-NT to control a pair of CAT powered diesel generators.
